

5° GO-DO

Acoustic design solutions for everyday environments

Designed by Gensler & Associates International Limited

okamura

Acoustic Panel Series

5° GO-DO is a series of plastic felt-made acoustic panels for echo and noise absorption. The panels effectively absorb speech frequencies, ranging from approximately 500 to 1000 Hz. Improve the acoustics by covering the entire wall or a small area according to room size and needs.

The panels’ modern aesthetic adds a tasteful, artistic accent. With four designs—flat, curve, cross, and ridge—5° GO-DO panels can be arranged to create simple patterns or creative configurations. The three shades of gray and different panel designs can be combined to match surrounding décor.

Magnets on the back corners of each panel allow quick and simple installation on steel surfaces. Steel brackets are also available and can be fixed on many wall materials for installation on non-steel surfaces.

Specifications

Dimensions : 450 W x 450 H x 50 T (mm)
17 3/4" W x 17 3/4" H x 2" (inch)

Material : Felt cover – Polyester 100%
Wadding – Polyester 100%

Installation : Magnet mounting / Steel brackets

Fire test : ASTM E84 Class A

Acoustics : NRC Value – 0.75 *Noise Reduction Coefficient
SAA Value – 0.76 *Sound Absorption Average
